WARNING: READ BEFORE USING YOUR PLAYSTATION®2 COMPUTER ENTERTAINMENT SYSTEM.
A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games, including games played on the PlayStation 2 console, may induce an epileptic seizure in these individuals. Certain conditions may induce previously undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game – dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions – IMMEDIATELY discontinue use and consult your physician before resuming play.

WARNING TO OWNERS OF PROJECTION TELEVISIONS:
Do not connect your PlayStation 2 console to a projection TV without first consulting the user manual for your projection TV, unless it is of the LCD type. Otherwise, it may permanently damage your TV screen.

USE OF UNAUTHORIZED PRODUCT:
The use of software or peripherals not authorized by Sony Computer Entertainment America may damage your console and/or invalidate your warranty. Only official or licensed peripherals should be used in the controller ports or memory card slots.

HANDLING YOUR PLAYSTATION 2 FORMAT DISC:
- This disc is intended for use only with PlayStation 2 consoles with the NTSC U/C designation.
- Do not bend it, crush it or submerge it in liquids.
- Do not leave it in direct sunlight or near a radiator or other source of heat.
- Be sure to take an occasional rest break during extended play.
- Keep this compact disc clean. Always hold the disc by the edges and keep it in its protective case when not in use. Clean the disc with a lint-free, soft, dry cloth, wiping in straight lines from center to outer edge. Never use solvents or abrasive cleaners.

controller port 2

clear tray
RESET button

Set up your PlayStation®2 computer entertainment system according to the instructions in its Instruction Manual. Make sure the MAIN POWER switch (located on the back of the console) is turned on. Press the RESET button. When the power indicator lights up, press the open button and the disc tray will open. Place the Tekken Tag Tournament™ disc on the disc tray with the label side facing up. Press the open button again and the disc tray will close. Attach game controllers and other peripherals, as appropriate. Follow on-screen instructions and refer to this manual for information on using the software.

MEMORY CARDS

To save game settings and progress, insert a memory card (for PlayStation 2) into memory card slot 1 of your PlayStation 2. You can load saved game data from the same card, or any memory card (for PlayStation 2) containing previously saved Tekken Tag Tournament™ games. When using a multitap (for PlayStation 2) (sold separately), insert the memory card (for PlayStation 2) into memory card slot A of the multitap (for PlayStation 2).

To read about how to save and load game data, see “Saving and Loading Game Data” on page 12.

CONTROLLER SETUP

2 PLAYER GAME

Two controllers are required. Connect each controller to a controller port.

GAME CONTROLS

3 OR MORE PLAYER GAME

For a 3-or-more player game, use a multitap (for PlayStation 2). Each player will need a controller. Connect the multitap (for PlayStation 2) to controller port 1 of the PlayStation 2. Then connect the controllers to the controller ports on the side of the multitap (for PlayStation 2). You cannot use the multitap (for PlayStation 2) in controller port 2. When a multitap (for PlayStation 2) is connected to controller port 1, a controller may not be connected to controller port 2.

Warning: The purpose of this game is for entertainment purposes only. Please do not attempt these moves at home.

Note: This game supports the vibration function of the DUALSHOCK™2 analog controller. To enable or disable the vibration function, go to the Options Menu (see page 10).

See page 26 for moves specific to each character and how to apply the game controls.

Note: See “Basic Techniques” beginning on page 16 for more controls.

SELECT button

START button

GETTING STARTED

Select a Tekken Tag Tournament mode:

1. On the Title Screen, press the START button to open the Mode Menu.
   See "Mode Menu" on page 7.
2. Switch the Pair Play Mode On/Off using the Left/Right Directional buttons. Turn it On when you want to fight in Pair Play Mode. (Pair Play Mode will be grayed out in modes where it is not available.)
3. Press the Directional buttons to choose the mode you want, and press the START button or the □ button to accept the selection.

Select characters:
1. On the Character Select Screen, press the Directional buttons to choose the first character for your team and press the □ button.
2. Repeat the process for the second character and press the □ button to begin the tournament.

MULTI-PLAYER GAMES

WHEN USING TWO CONTROLLERS:
The player (1P on the left, 2P on the right) who presses the START button first proceeds to the Character Select Screen. When the Pair Play Mode is On, the second player can choose a side to play on. If the second player selects the same side as the first player, you both are on the same team (Tag Team).

WHEN USING 3 OR MORE CONTROLLERS:
Pair Play Mode must be enabled for games where there are more than 2 players. The method of choosing sides in Pair Play Mode is the same as in a 2 controller game. However, once 2 players are paired up on one side, the next player can no longer select a team to play on, and is automatically assigned to the opposing side. Character selection priority is determined by the player who presses the START button first. When Pair Play Mode is Off, only 2 players can play even if there are 3 or more controllers connected.
MATCHES
A team consists of two fighters who compete one at a time against another team. The partner stands by, ready to take up the fight when tagged.

- Competitors can tag their partner at anytime (L1, L2, R1, R2 button or the right analog stick).
- Win a match by forcing the opponent's health meter to 0, or by maintaining a higher health meter than your opponent until the end of a round.
- When time runs out, the team with the highest combined health remaining wins.

END OF ROUND
- A round is over when the clock runs out or there is a knock out.
- If both fighters are knocked out or if both players’ health meters are at the same level when Time Up is called, the match is a draw.
- Both players are awarded points in a draw.
- If you draw in the final round of Arcade Mode, the game is over. The first player will be declared the winner in a multi-player game, and the match ends in VS Battle Mode.

GAME OVER AND CONTINUE
- When you lose in Arcade Mode, the game is over. However, pressing the START button on the Continue Screen allows you to restart the game from the last stage you played as long as you press the START button within the time limit.

ARCADE MODE
Compete against the computer or other players and win the game.

- If you defeat all CPU opponents, you win and an ending story will be revealed.
- If you are defeated in a match, you may continue your game an unlimited number of times. You have 10 seconds to continue before GAME OVER is called. You can also select new characters before continuing gameplay.
- Up to four players can compete. See “Pair Play Mode” on page 9.

TIME ATTACK MODE
Compete against the clock until you complete all the stages and beat the game. This mode is the same as Arcade Mode with the following exceptions:

- You cannot pause the game.
- You cannot select new characters when continuing the game after a defeat.
- Two players can compete against the CPU in Pair Play Mode.

SURVIVAL MODE
Defeat as many CPU opponents as you can before your health meter runs out.

- Once you are defeated in even one round, the game is over...
- There are no continues.
- Every victory earns your team extra health points, but you will never recover completely from damage.
- Two players can compete against the CPU in Pair Play Mode.
**MODE MENU**

**VS BATTLE MODE**
Two or more players can sequentially compete against each other. You can select new characters every time the battle is over. The match results are also displayed.

- This mode has adjustable health meters so you can create handicap values to give less skilled players an advantage.
- When Pair Play Mode is turned On, up to four players can compete simultaneously.

Press the Directional buttons Left/Right after character selection to raise or lower the health points of both sides. Press the X button to set the value. You can adjust the health points from 1% to 150% of normal for either side.

**1 ON 1 BATTLE MODE**
Play 1 on 1 matches with only one character on each side. Fight against the CPU or another player.

**TEAM BATTLE MODE**
This mode lets you create teams with up to eight characters on each side. Press the Directional buttons Left/Right to select the number of team members, then select each character.

- Defeat all opposing team members to win.
- Teams can be unevenly matched with more fighters on one team than on the other.

**PRACTICE MODE**
Study the fighting style of a character. See "Learning to Fight in Practice Mode" on page 15.

**PAIR PLAY MODE**
Pair Play Mode allows multiple players to choose sides in Arcade, Time Attack, Survival, and VS Battle Modes.

- In a 2 player game, both players can compete on the same team.
- In 3 or 4 player games, two players can fight against another player or square off with two players per side.
- The player who opens up the Character Select Screen is automatically assigned a side and cannot change teams.
- Additional players can enter the game during play by pressing the START button on their controller. This will stop the present match and return to the Character Select Screen.

To set up Pair Play:
1. Make sure Pair Play Mode is turned On in the Mode Menu.
2. Choose a side. On the Character Select Screen, press the Directional buttons Left/Right to move the cursor (controller symbol) to the side you want to play on and press the X button.
3. Select a character. The first player to press the START button selects a character first. The first character selected is the starter and the second is the tag team partner.
OPTIONS

Configure game settings.
1. Press the Directional buttons Up/Down to choose the items you want to change and press the X button to display their contents.
2. Press the Directional buttons Left/Right to change a setting.
3. Select EXIT and press the X button to return to the Mode Menu.

GAME OPTIONS

Set various game options throughout the game. Look at the lower right side of the Options Menu to see which modes are affected by the changes you make. Use the Up/Down Directional buttons to select an option. Change the settings by using the Left/Right Directional buttons.

DIFFICULTY LEVEL - Adjust the CPU’s level of difficulty.

FIGHT COUNT - Set the number of rounds for each fight.

ROUND TIME - Set the round time for each round.

CHARACTER CHANGE AT CONTINUE - Allows you to change characters at the Continue Screen.

GUARD DAMAGE - Set whether or not damage is taken while guarding.

CHARACTER SELECT CURSOR - Set the Character Select cursor position. When set to HOLD, return to the Character Select Screen and the cursor will remain on the last character chosen.

QUICK SELECT - Allows you to select your characters quickly on the Character Select Screen.

CHICKEN MARKING - Set the Chicken Marking display On/Off. (The Chicken Marking is displayed when non-aggressive play is repeated.)

HELP MESSAGES - Set help messages On/Off.

SPEAKER OUT - Set to either STEREO or MONO settings.

BGM VOLUME - Adjust the background music volume.

SE VOLUME - Adjust the sound effects volume.

DEFAULT - Reset to default settings. (Default settings are in green and custom settings are in red.)

CONTROLLER SETUP

SETTINGS - Change the button configuration:
1. Press and hold the button you want to change.
2. Press the Directional buttons Left/Right to select a new function and release the button.

VIBRATION - Enable or disable the vibration feature.

DEFAULT - Reset to the default settings.

RECORDS

TIME ATTACK - Time Attack Mode Records.

GREATEST SURVIVORS - Survival Mode Records.

CHARACTER USAGE - Shows how often a character was used.

ADJUST DISPLAY

Adjust the screen position by pressing the Directional buttons.

MEMORY CARD (FOR PLAYSTATION 2)

Use this option to save and load game data and settings. Use the Directional buttons to select an item and press the X button.

LOAD DATA - Load previously saved data.

SAVE DATA - Save current game data.

AUTO SAVE - Automatically save game data.

See “Saving and Loading Game Data” on page 12.

Note: Insert the memory card (for PlayStation 2) into memory card slot 1 of the
SAVING AND LOADING GAME DATA

console. When the multitap (for PlayStation 2) is connected, insert the memory card (for PlayStation 2) into memory card slot A of the multitap (for PlayStation 2).

You can save game data, options settings and the ending movies to a memory card (for PlayStation 2).

To access the memory card (for PlayStation 2):

1. Select OPTIONS on the Mode Menu and press the ❌ button.
2. Select MEMORY CARD and press the ❌ button.

Tekken Tag Tournament has an Auto Save feature that will save all game data for you. Select AUTO SAVE and press the Directional buttons Left/Right to turn Auto Save On. When you play the game later, the saved info is automatically loaded when you start the game.

To save manually, select SAVE and press the ❌ button. You will be asked whether to save current game data. Select YES and press the ❌ button.

To load manually, select LOAD and press the ❌ button. You will be asked whether to load game data. Select YES and press the ❌ button.

THE GAME SCREEN

Partner Health Meter

Health Meter

Character Name

Round Time

Round

Consecutive Wins

HEALTH METER
Shows the remaining health of each character. An opponent's attack will cause the blue remaining Health Gauge to decrease. Characters will recover health points up to the red portion of the gauge (the Recovery Gauge) while waiting to tag in to a fight.

PARTNER'S HEALTH METER
Shows the Health Gauge of the character who is standing by. Depending on the combination of characters, when the character in the battle is in crisis, this meter blinks in red. If you change characters at this time, you can attack with an intensified power for a fixed period of time.

CHARACTER NAME
Displays the name of the character currently fighting.

CONSECUTIVE WINS
Displays the number of consecutive wins in multi-player mode.

ROUND
Earning points in a set number of rounds allows you to win.

ROUND TIME
Time remaining in the round. When the counter reaches 0, time is up. The player with the greatest amount of health remaining wins. The time limit can be adjusted from 30 seconds to infinity on the Options Menu (see page 10).
THE PAUSE SCREEN

Press the START button to open the Pause Screen. Press the Directional buttons Up/Down to select an option and press the X button to open it.

CANCEL - Return to gameplay.
RESET - Return to the Mode Menu.
COMMAND LIST - Displays moves for the active character. Press the Directional buttons Up/Down to scroll through the list. Press the X button to close the list.

ADJUST DISPLAY - Press the Directional buttons to move the display.
CONTROLLER SETUP - Change button configurations, return to default settings or turn the vibration feature On/Off.

LEARNING TO FIGHT IN PRACTICE MODE

Practice Mode gives you a chance to learn all the moves of any particular character.

In Practice Mode you can:
- Adjust the actions of your opponents (training dummies) to fit the kind of practice you want.
- Practice your moves as much as you want without taking damage.
- See a list of moves (Command List) for each character and order a demonstration of any move.
- Replay your moves.
- See the damage ratings of various attacks on-screen.
- See on-screen combination counts when a combination is correctly executed.
- See range (high, mid and low) displays for every punch and kick.
- Select from four practice modes.
- Practice with up to four players.

The default practice mode is Freestyle. To change modes and settings during practice:
1. Press the START button during practice to pause and open the Practice Menu.
2. Highlight MODE SELECT and press the Directional buttons Left/Right or the X button to select a mode.
3. Press the Directional buttons Up/Down to select a setting and press the X button to switch a setting or accept a selection.
4. Press the button to return to practice.

FREESTYLE
Select whatever conditions you want for yourself and the opponent.

VS CPU
Compete against the CPU. You can select the level of difficulty for CPU opponents.

CHAIN TRAINING
Practice moves from the Command List and quickly input moves as they are displayed.

COMBO TRAINING
Practice executing or avoiding combo moves.
The following techniques are common to all *Tekken Tag Tournament* characters. Controls are given for characters facing right. Reverse the controls when the character is facing left.

**MOVING IN AND OUT**

**RUNNING CHARGE** - Overwhelm opponents by rushing directly into them. Quickly tap the Directional button twice in the direction of the opponent.

**HOP BACK** - Dodge a punch or kick. Quickly tap the Directional button twice away from the opponent.

**JUMP BACK** - Press the Directional button Up and away from the opponent.

**CROUCH** - Avoid mid or high attacks or deliver your own attack. Press the Directional button Down.

**CROUCHED ADVANCE/RETREAT** - Press the Directional buttons Down and Left/Right.

**JUMP** - Jump to deliver high attacks or avoid low kicks or sweeps. Press the Directional button Up.

**BACKFLIP** - Strike to the head or retreat. Press the Directional buttons Up, Left, Left. Note: Some characters cannot do backflips.

**SIDESTEP** - Position for an attack or avoid a strike. Move around your opponent's side. Repeated sidestepping allows you to circle around to your opponent's flank. Tap the Directional button Up or Down quickly.

**THE COMMAND LIST**

The Command List shows the moves for your current fighter.

Access the Command List during gameplay by pressing the START button, selecting COMMAND LIST and pressing the button. You can also access the Command List for every available character in Practice Mode.

- The moves shown on the Command List are for characters facing right. Reverse Directional buttons when the character is facing left.
- The button descriptions correspond to the DUALSHOCK 2 analog controller and Namco Joystick.
- ▶ means to press the Directional buttons quickly.
- ➢ means to press the Directional buttons for an extended period.
- ★ means to leave the Directional buttons neutral (untouched).
- ◆ ◆ ◆ means to press buttons sequentially.
- ◆ + ◆ means to press buttons simultaneously.
REGULAR ATTACKS
The following buttons represent the limbs of the characters. Perform basic attacks by pressing them.

- Left Punch: D button (left arm)
- Right Punch: A button (right arm)
- Left Kick: X button (left leg)
- Right Kick: C button (right leg)

Attacks in this game are divided into three categories depending on what part of your enemy's body you wish to hit: high, mid body or low.

TYPES OF ATTACKS

HIGH RANGE ATTACKS
Hits standing enemies. High attacks won't hit a crouching opponent, and will not cause damage to enemies in a standing guard stance.

MID BODY ATTACKS
Can hit both standing and crouching enemies. Will not cause damage to enemies in a standing guard stance.

LOW RANGE ATTACKS
Hits both standing and crouching enemies. Can be blocked by a crouching guard stance, or avoided by jumping over enemies.

DASH ATTACKS

RUNNING TACKLE
Double-tap the Directional button toward your opponent. You must take three or more steps before hitting the opponent, so execute this attack from a distance. You will knock the enemy over and sit on the character. You can then deliver additional attacks from this position.

RUNNING CROSS ARM
Double-tap the Directional button toward your opponent, then D+A.
Run at the opponent, making sure you take three or more steps. Fly into your enemy while executing a mid range cross chop.

SLIDING DASH
Double-tap the Directional button toward your opponent, then C.
Run at the opponent taking three or more steps. Slide into your enemy as a low range attack. This command performs different moves for King and Yoshimitsu.

UNBLOCKABLE TACKLE
Double-tap the Directional button toward your opponent. Run into the enemy after four or more steps to execute a shoulder tackle that cannot be blocked or counter-attacked.

THROWS
A+C (or D+X)
Throws are carried out by grabbing the enemy. Throws have a weak point: You have to get close to the enemy and are vulnerable until you grab the opponent. However, a throw inflicts major damage on an opponent.

GUARDING
Use guarding to block attacks.

STANDING GUARD
→ Defends against high attacks and mid range attacks. However, it is vulnerable to low range attacks or throws.

CROUCHING GUARD
↓ Defends against low attacks. Crouching allows you to avoid most of the high attacks and throws. However, you cannot guard against mid range attacks.
Note: When you are attacked, if the Directional buttons are neutral (untouched), the standing guard stance is automatically carried out. If the Directional button is Down, a crouching guard stance is carried out. However, consecutive attacks and certain other moves may break these defenses.

**RAISING KI (SUPERCHARGER)**

- Press D + A + X at once.
- When the ki is raised, the attacking power momentarily increases. Your fighter will glow or shoot sparks and his or her hands may emit light. All attacks in this state become counter hits and allow you to inflict damage to an enemy who is on guard. However, while raising your ki, you are vulnerable to an enemy's attack.

**UKEMI (QUICK ROLL)**

- Into the foreground, X or O
- Into the background, O or A
- Use this technique when you are knocked down to recover and get back on your feet quickly. Perfect timing is important to the execution of this move.

**ESCAPES**

**BASIC AVOIDANCE THROW**

- D or A
- Execute the move at the moment you are being grabbed during an opponent's throw attack to avoid being thrown.

- To avoid a front throw (D + X), press the D button.
- To avoid a front throw (A + O), press the A button.
- To avoid right/left throws, use the punch command (D or A) for the direction from which you are being grabbed.
- You cannot escape from a back throw.

**HIGH AND MID PARRY**

- Press D + L (or O + X)
- Use this move to synchronize with an opponent's attack. Only certain characters can use this technique. If you are successful, you can quickly attack your enemy by taking advantage of his or her vulnerability.

**LOW PARRY**

- Press O + L (or A + O)
- Use this to avoid low range attacks. As with high and middle range avoidance moves, only certain characters can perform this move. If you are successful, you can take advantage of an enemy's vulnerability.

**LOW PARRY WITH DIRECTIONAL BUTTONS**

- Press D button while matching an enemy's attack
- This move is available to all characters. When you press the Directional buttons with the right timing, even characters who cannot execute regular low pary moves can avoid a low range attack.

**COUNTER THROW ATTACK**

- Press X + L (or A + O) while matching an enemy's attack
- Some characters can avoid an enemy's attack and deliver a counter throw attack at the same time. Only high and mid range attacks can be avoided and the success of this move depends on precise timing.

**GROUND ATTACK**

**STOMP**

- Use this move when you have knocked an enemy to the ground. Jump onto your enemy with all your weight.

**TRAMPLE ATTACK**

- Run into the enemy after taking four or more steps.
- This is a type of dash attack where you trample the enemy into the dirt.
BASIC TECHNIQUES

GETTING UP WHEN YOU ARE DOWN

RISE UP IN PLACE

↑
Rise up right where you are. This is the fastest way to get up from the ground.

FORWARD ROLL (BACKWARD ROLL)

← (↓)
Rise up as you roll toward or away from your enemy.

SIDE ROLL

□ or ▼ + □ while lying face up
Roll over when you are knocked down. From this position, you can continue to perform a forward or backward roll or rise up kicking.

QUICK RECOVERY

↑ While falling
Press the □ button repeatedly after you are knocked down to rise more quickly than usual.

GETTING UP WITH A KICK

RISE UP IN PLACE

Rise up and deliver a low (mid) range kick.

RISE ANKLE KICK

↓ + ○
While lying on your back with your feet toward the opponent, use this move to execute quick but weak repeated kicks.

TAGGING

SPRING KICK

□ + ○ at the beginning of a backward roll
As with the ankle kick, this move is possible only when you are lying on your back with your feet toward the opponent. It is an effective counterattack when an enemy approaches to finish you off.

RISING CROSS-CHOP

△ + ○ at the start of a backward (forward) roll
Perform this kick while lying on your back with your legs pointed toward the enemy.

TAGGING

Tagging is changing fighters during battle. Tagging brings in a fresh fighter, allowing the current fighter to regain health. It is also a tactical weapon for exploiting weaknesses in the opposition.

Press the R1, R2, L1, or L2 button or the right analog stick to tag a partner.

REGULAR TAG

Tag button
Change characters while standing. When the character disappears off the screen, the tag is a success and the partner will dash into battle. If the outgoing character is attacked by an enemy before disappearing off the screen, the tag is blocked.

RISING CHANGE

Tag button while down
Change characters while on the ground. The tagged partner enters standing and the current fighter recovers faster than usual. However, the opponent may be able to block the tag by attacking the downed character.
TAGGING

UKEMI CHANGE
Tag button when landing
Use this when you are hit hard or airborne from an attack
and tag just as you hit the ground. If you are successful in
performing the Ukemi Change, your fighter will run off the
screen just as he or she hits the ground.

ATTACK CHANGE
To throw an opponent and tag as the opponent hits the
ground, press \ + Tag button. If the throw is properly ex-
ecuted, the partner rushes in from the side and performs a
ground attack on the downed fighter. The move cannot suc-
cceed if the opponent escapes the throw.

MID-MOVE CHANGE
All characters have commands that allow for a change in
mid-move. Tag the moment you hit the enemy, and your
partner will come onto the screen and continue your attack
while the enemy is in the air.

INTRODUCING THE CHARACTERS

All characters from previous Tekken series appear in the Tekken Tag Tournament.
The characters available from the start of the game will be introduced here. Finish
all stages of Arcade Mode and additional characters will be revealed. Until then
they are hidden behind question marks on the Character Select Screen.

READING THE BUTTON COMMANDS
- The moves shown on the Command List are for characters facing right. Reverse
  Directional buttons when the character is facing left.
- The button descriptions correspond to the DUALSHOCK 2 analog controller
  and Namco Joystick.
- ◇ means to press the Directional buttons quickly.
- ◇ means to press the Directional buttons for an extended period.
- ★ means to leave the Directional buttons neutral (untouched).
- ◇ means to press buttons sequentially.
- ◇ + ◇ means to press buttons simultaneously.

SPECIAL TAG COMBINATION
When specific characters are teamed together, you can perform special combina-
tion moves at the time of the tag. Here is an introduction to the special tag combina-
tions of Jin and Jun Kazama, who are mother and son:

JIN KAZAMA ➔ JUN KAZAMA
Ultra Pachiki (Approach and ◇ ◇ + ◇ to Reverse Arm Bar)
While Jin is fighting and successfully performs a *Stonehead* and the Tag button
is pressed, Jun will perform a *Reverse Arm Bar* on the faltering enemy.
### Jin Kazama

**Country of Origin:** Japan

**Fighting Style:** Advanced Mishima Style Karate, Karate Style Defense (learned from his mother and self-taught)

**Age:** 19

**Height/Weight:** 180cm/75kg

**Blood Type:** AB

LIMITED WARRANTY

Nameco Hometek Inc. warrants to the original purchaser that this Nameco Hometek Inc. game pak shall be free from defects in material and workmanship for a period of ninety (90) days from the date of purchase. If a defect covered by this limited warranty occurs during this 90-day limited warranty period, Nameco Hometek Inc. will repair or replace the defective game pak or component part, at its option, free of charge.

This limited warranty does not apply if the defects have been caused by negligence, accident, unreasonable use, modification, tampering, or any other cause not related to defective material or workmanship.

LIMITATIONS ON WARRANTY

Any applicable implied warranties of merchantability and fitness for a particular purpose, are hereby limited to ninety (90) days from the date of purchase and are subject to the conditions set forth herein. In no event shall Nameco Hometek Inc. be liable for consequential or incidental damages resulting from the possession or use of this product.

The provisions of the limited warranty are valid in the United States only. Some states do not allow limitations on how long an implied warranty lasts, or exclusion of consequential or incidental damages, so the above limitation or exclusion may not apply to you. This limited warranty provides you with specific legal rights. You may have other rights which vary from state to state.
